CAREER OBJECTIVE

Seeking a challenging position in the field of software development within a technology-driven enterprise. Eager to leverage my academic knowledge and technical skills to contribute to innovative projects. Looking for opportunities to apply my expertise in creating efficient, scalable, and high-quality software solutions. Dedicated to continuous learning and professional growth in a dynamic work environment.

SKILLS

Programming Languages	Web Technology	Frame Works	DBMS
Java	HTML5	Node Js	MongoDB
Python	CSS	React Js	H2 DataBase
JavaScript	Bootstrap 5		

PROJECTS

Second Hand Car and Spare Parts

Developed a responsive web application using HTML, CSS, and Bootstrap for buying and selling second-hand cars and spare parts. Implemented a user-friendly interface with detailed product listings, including images, descriptions, and pricing. Integrated search functionality to enable users to easily find specific cars or spare parts. Designed an intuitive and sleek layout to enhance user experience and improve accessibility.

Liquor Shop

Designed and developed an e-commerce platform for a liquor shop, allowing customers to browse, search, and purchase a wide range of alcoholic beverages online. Integrated secure payment gateways for smooth transactions and implemented user-friendly features like product categorization, detailed product descriptions, and customer reviews. Utilized React for the frontend interface, Node.js and Express for the backend server, MongoDB for database management, and integrated Multer for efficient image uploads. Employed authentication and authorization mechanisms to ensure secure access and transactions.
